🎓 Education
BEc, Economics, Ming Chuan University 2012 - 2016

Full Stack Developer, RSTN Consulting, Taipei, Taiwan Jan 2022 – Present

`C#/.Net Core/MS SQL/HTML/CSS/JavaScript/TypeScript/jQuery/Angular.js/Angular/Restful API/RxJs`

Financial project development of legal person property insurance,

- Utilized the Angular.js template syntax to create dynamic views and display data retrieved from the server-side using WebAPI, Implemented dependency injection to facilitate modular code and maintainability in the Angular.js front-end.
- Angular.js component lifecycle hooks to ensure efficient rendering and minimize performance issues.
- Implemented RESTful APIs using .NET WebAPI to interact with the database and retrieve necessary data for the Angular.js front-end. Conducted testing and debugging of both the Angular.js front-end and .NET WebAPI back-end to ensure seamless functionality and user experience.
- Collaborated with cross-functional teams to ensure timely delivery of high-quality code and effective communication of project progress and issues.

Real estate management system in the life insurance industry, participating in the front-end part of the case,

- Project scale: several tens of Components and two Modules.
- Complexity: have used several advanced Angular technologies such as NgRx and RxJS, which indicates that the code might be relatively complex.
- Project accomplishment: successfully deployed the project to production.
- Angular technology stack: have a basic understanding of Angular framework, including Template Syntax, Dependency Injection, and Component Lifecycle Hooks.
- Front-end technology stack: have a basic understanding of several common front-end technologies, including JavaScript, HTML, CSS, TypeScript, and Webpack.
- Development tools: have used several common development tools, including Visual Studio Code, Angular CLI, and Git.

Financial Consultant/ Teller, E.sun Bank, Taipei, Taiwan Aug 2020 – Aug 2021

- During internship as a bank teller, I was responsible for providing customer service while processing financial transactions for clients. I ensured accuracy in cash handling, account management.
- After internship, In my role as a financial advisor, I provided personalized investment and financial planning advice to clients based on their financial goals and risk tolerance. I worked with clients to develop customized investment portfolios and provided ongoing support to help them achieve their financial objectives.

Technical Skills

- Programming languages: C#, TypeScript, JavaScript
- Frameworks and libraries: .NET, Angular, NgRx, RxJS, Entity Framework

Voluntary Experience

Chef, Housekeeper, Receptionist, Ellel Ministries Christian Centre, Farnham, Surrey, England May 2018 - Mar 2020
- Nine months Christian discipleship in English, which basically takes reference on military life, including character training, bible study, work out, and curfew. And besides that, we still need to work five days every week.
- Jobs during working Days: Chef in the kitchen. Housekeeper, room cleaner, and receptionist.
